"Interns are an important part of OmniByte history and future. I have been utilizing the Operation Intern program nearly since its inception. I have been a big supporter of having a solid internship program where we provide real-world work for students while realizing value-added output from them."

– OmniByte Technology President and CEO Ray Berry

Attracting workers to North Dakota is essential in helping to meet the state's current and future workforce needs. Internships provide a valuable way for students to make connections with businesses and identify career options in North Dakota. Operation Intern is designed to expand the number of internships, work experience and apprenticeship positions with North Dakota employers.

The program's primary focus is employers in the state's targeted industries: energy, advanced manufacturing, value-added agriculture, tourism and technology-based businesses. Priority also is given to new start-ups, companies that never have participated in the program and new internship or apprenticeship positions or whose intern positions qualify as in-demand positions.

North Dakota businesses receive up to \$4,000 in matching funds for the internships. Funding can be used for items needed for the intern to perform their internships, like wages, tools and equipment, essential training or tuition reimbursement. The funding is a one-to-one match.

The Workforce Development Division of the North Dakota Department of Commerce manages Operation Intern.

"This apprenticeship program is important as this is a growing and important field with a limited number of graduates. It allows us to select solid employees and offer them the opportunity to develop new skills and earn higher wages."

– Marvin Windows Human Resources Manager Vicki Ham
